Indianapolis, August 21, 1881.-I have your letter of the 19th instant. I cannot consider with favor your suggestions of a change in the national ticket. The action of the committee cannot now be reconsidered, must stand, and I think it ought to stand. I do not agree, with you in respect to the probable result. I think the probabilities are favorable to the success of our ticket. The Cleveland scandal will not have weight with the peopl tional contest. Three times Governor Cleveland has stood the test of a popular canvass-once for the office of mayor in his own city dorsement of his neighbors by a vote largely have been of scandal existing before, it is not just either to him or the people now to revive it. The public record, by his capability and fitness for the discharge of the responsible and important public duties, and not by old and exploded private slanders. Very respectfully, yours, etc.

T. A. HENDRICKS. BEECHER ON CLEVELAND.

He Pelieves Him to be an Angel of Light When Compared to Blaine.

NEW YORK, August 27.—General Horatio C King, who went to Buffalo to investigate the Maria Halpin scandal, called at the nationa democratic headquarters with an additional statement yesterday. The general had had snother interview with Mr. Beecher, whom

stories about Governor Cleveland, detailing what he did when he was a good deal younger than he is to-day, and all the gross exaggera-tions that have been made by his enemies since, and the statement of gentlemen with whom I am acquainted, and whose character I well know, satisfies my mind that the governor has been subjected to gross and outrageous misrepresentation. While I forbore and waited until I had adequate light. I am satisfied now that Cleveland is the proper man for president. In view of Mr. Blaine's public and political conduct Cleveland. and political conduct, Cleveland is an angel of light. How any man can vote for Blaine because of a conscientious scruple that prevents him from voting for Cleveland of the ground of morality passes my conception. I regard Blaine as one of the most corrupt men in pecuniary affairs we have ever had in our government. What part I shall take in the advocacy of Mr. Cleveland I can fell better after my return to the city." shall take in the advocacy of Mr. Greenand I can tell better after my return to the city." Further, General King says that Mr. Beecher hopes to ree Cleveland elected by so big a majority as "to terrorize any man like Blaina from being so foolhardy as to run for president for the next fifty years."

ST. JOHN GAINS STRENGTH. The American Party Withdraws in His

Washington, August 27.—Edwin D. Bailey, secretary of the national committee of the American party (anti-secret), says to-night that ex-Senator S. C. Pomeroy, who was nominated for president at the convention held in Chicago, June 20 and 21, will withdraw in favor of St. John. When the convention was in session St. John's name was prominently menvor of St. John. When the convention was in session St. John's name was prominently mentioned by the leaders of the party in connection with the presidency. It was thought, however, that his nomination at that time would prevent his securing the nomination of the prohibition party at Pittsburg, and without that nomination the American party did not desire his name at the head of the ticket. A resolution was named by the convention at resolution was passed by the convention gi any vacancy that might occur. Next to St. John, Senator Pomeroy was said to be the choice of the convention. A conference was held with the latter, and at his own suggestion, Mr. Bailey says, it was agreed he should be nominated with the understanding that if St. John was nominated at Pittsburg he would withdraw in his favor. Pomeroy was present at the prohibition convention, and to a num-ber of prominent persons, after the nomiof prominent persons, after the nomion of St. John, signified h nation of St. John, signified his intention of withdrawing, in pursuance with his agreement at Chicago. The national com-mittee of the American party will meet either at Chicago or in this city early in September, when their presidential candidate will recommend that the vote of the party be given to St. John. Bailey says there is no doubt but that the action of Fomeroy will be acquiesced in by the withdrawal in favor of St. John. It is estimated, this will give him 40,000 votes through the influence of the American party.

The Ancient Order of Hibernians Denounce The New York Clique.

New York, August 27.—The following is given out by the officials of the Ancient Order of Hilpertons. given out by the officials of the Ancient Order of Hibernians as a correct statement of the dispute among the members of that order:

The statement recently published about the great benevolent organization, having branches in every portion of the country, and known as the every portion of the country, and known as the country of the order of Hibernians, was, it now appears, founded on misrepresentation. The opposition to the national organization, effected at the regular biemnial convention at Cleveland, proves to be so insignificant as to be of no account, and is confined almost exclusively to some branches in this city. They say it has ar definial convention at Cleveland, proves to be so insignificant as to be of no account, and is confined almost exclusively to some branches in this city. They say it has been elaimed by these New Yorkers for many'years that the national officers should be residents of this city, with their offices of administration here, but the membership of New York state, and of the chitic country, has not acknowledged this claim, at the convenience of the entire orgalization his been promoted by locating the offices and exciting national officers according to the will of the majority, without the narrow limitations of localities. The New York city men, in order to enforce their pretensions, held what they described as a national convention for the purpose of disciplining the entire membership of which they constitute a Tooly street transpires was held in a dinay little room convention expelled the officers, after the national delegate, Hon. Henry F. Sheridan, of Chicaco, with the national secretary, and the treasurer. The Brooklyn county board of the order has held the largest meeting since its organization, hirty-nine divisions being represented, and repudiates the action of the New York clique, indorsing Sheridan and his brother officials. Eighteen divisions of the New York countries of the proportion of the New York countries and repudiates the action of the New York countries. the New York country have also had a meeting, and adopted similar resolutions. The state officers of New York, Massachusetts, Georgia, Missouri, Connecticut, Michigan, Illinois, Wisconsin, and other states, which was a stand by the regular action of the order. The pretending delegate from Illinois at the clique convenion was James E. Dunn, who, it is of record in the Chicago division, was expelled from the order the clique folly was undertaken. All the national officers, all the national directory, and the predecessor of Sheridan at the head of the order, support him, and the regular official staff elected at Cleveland.

ROTTENNESS IN VIRGINIA. The Repudiation Leaders as Debtors to a Broken Bank.

RICHMOND, Va., August 27.—In the house of elegates to-day, Mr. Pollard, chairman of the ommittee on finance, submitted the report of that committee of the investigation of the Planters' and Mechanics' bank of Petersburg, which recently failed, and the status of the state's funds deposited therein. The report, after giving the various deposits made in the bank, and othes details connected therewith, says:

The amount due the state on May 1st, 1884, was 183,373. The committee find that the money of he state deposited in this bank so mingled with be other funds of the bank, and so used as to nake it impossible for the committee, in the time and from the sources of evidence at its command, to ascertain the precise use of the identical money of deposited. The greater portion of the deposite seem to have been transferred to the Chase national bank of New York, or the First national bank of Richmond, and to have been ultimately paid our lifetiment, and the lifetiment and lifetiment lifetiment in the lifetiment when the lifetiment in the lifetiment is the lifetiment when the lifetiment is the lifetiment lit

through these banks. While the committee have not traced the identical state money deposited in this bank into hands any individual they find that the books of the bank show what must strike the mixed as a startling fact that, with a capital stock of only \$119,550, the enormous sum of \$111,810 had been allowed to be drawn from the bank by overdrawn that the banks of the bank by overdrawn the bank of the bank by overdrawn to the terms of the bank dosed its doors, in addition to the very large sums previously overdrawn by avorities of the bank, which had been covered by notes upon which no security had been required, and most of which notes are utterly worthless. Among the names of those upon whose checks the largest of these overdrafts were drawn, are \$tith, Balling & Co., \$19,000; Wm. E. Cameron, governor, nearly \$4,000; State Senator W. E. Galnes, \$8,000; Ingo & Mahone, the latter the son of General Mahone, nearly \$15,000; General Wm. Mahone, nearly \$1,000; Thos. Whyte, cashier of the bank, \$15,600; and R. A. Young over \$800. In addition to the smounts due the bank on account of overdrafts, there were \$20,000 due upon notes and bills receivable. Of these assets a very large proportion is represented by notes of persons hopelessly insolvent, and supported by no security, or by insufficient security. Among these are \$tith, Balling & Co., call loan for \$10,000; Governor Wm. E. Cameron, sundry notes, \$3,400; Inge & Mahone. \$88,000; George Perkinson, over \$3,000; Those, \$10,700; Davis, Drake & Co., \$200; Stratton & Co., of which from Edward Whyte is the only nember, \$38,000; C. It is proper to say that these collaterals were considerated at the time the loans were made to Governor Cameron, good for the amount of his notes, but have since greatly depreciated.

It is a significant fact, and one that has been satisfactorily explained to them, that the above named parties, who were permitted in such an extraordinary manner to overdraw their accounts and receive enormous loans from banks without security, were readjuster coalitionists, except Edward Whyte and his brother, the readjuster cashier. BLOOMINGTON, Ill., August 27 .- At 10 o'clock this morning, the anti-monopolist state convention met, and at once adjourned to meet at moon with the Greenbacker State Convention convened under the McGeighan call. The two bodies will unite, and the leaders propose to adopt the name of "the people's party." The policy outlined is to nominate a full state ticket, and refer the question of fusion on an electoral vote to the state central committee, with in-structions to make the best bargain possible for electoral votes for Butler with either of the old parties. John O. Oberly, chairman of the state democratic central com-mittee is here laboring for fusion on the basis of lividing the electoral vote between Cleveland and Butler, the greenbackers to support the lemocratic state ticket. A democratic and and greenback electoral fusion in some shape will be probable. The outcome of to-day's proceedings with separate greenback state ticket in the field.

MARSHAL TRACEY'S CALL UPON THE GOVERNOR OF TEXAS. nor Ireland Informs the Officious Individual

GALVESTON, August 27 .- The News' Austin pecial says, United States Marshal Tracy arrived there on Tuesday, entered the governor's office in the afternoon, bent on arresting Governor Ireland under the warrant issued in the Francois miscegenation case. Tracy introduced the subject by saying:

"Governor, I suppose you know what I am here for."

The governor made a suitable reply. Tracy said he regretted the necessity that he should bare to perform such an official duty as to arrest the governor of Texas, and presented his warrant. Governor Ireland, at this juncture, relieved Colonel Tracy by saying he would always cheerfully submit to a process legal on its face, and would answer at the court as required, but he considered that the marshal of the eastern district of Texas had no authority to serve the process here outside his district that the proceedings at Galveston were without a shadow of fact upon which to base a case. This being so, while he made no resistence to the writ, and would answer as any citizen should, he would hold Tracey and others who had interested

conduct.

Tracey referred the governor to the United States statutes on the subject, which the gov-ernor declared he had already examined, and he so explained their tenor, that Tracey, without making the arrest left the executive effice to consult United States District Attor-ncy Evens, taking the warrant with him. In a couple of hours Tracey returned, and informed the governor that he would not ex-

the preceedings in strong language. In answer to a written question bearing on the case submitted to Evans by Tracey, the former furnished Tracey a written opinion declaring that Tracey, as United States marshall of the eastem district of Texas, had no authority to ar-rest a citizen resident, and found in the western district under a writ issued by the United States commissioner for the eastern district, not a special case. Tracey informed the governor that he would return to Galveston. Manwhile the governor awaits the next move in this celebrated case. It is understood that Judge Evans advises that proceeding by Francois be dismissed.

The case is very much like the one against Bruce, described in The Constitutions a few days ago. The amount of damages claimed is the same as in that suit—ten thousand dollars. The amusing part of the business is that. The amusing part of the business is that, should the detendants be found guilty, neither one of them would be able to pay the one-hundredth part of the amount claimed. It should be borne in mind, however, that money is not what McDaniel is fighting for. He wishes to vindicate the reputation of his wife.

ADMIRAL COURBETS REPORT.

The official report of the bombardment at Foo Chow last Saturday, received from Admiral Courbet, is as follows:

Foo Chow Sunday Morning, August 24.—A good beginning has been made. We opened fire yesterday. In four hours seven Chinese men-of-war and twelve thisks were sunk, and the Krupp battery commanding the arsenal was silenced. Our loss was six killed and twenty seven wounded. The fleet suffers no serious damage except that the boiler of a torpedo boat burst. The Chinese losses were heavy. During the night the fleet was beste by burning wreeks and logs. The torpedo cutters will clear all this to-day and afterwards we will bombard the arsenal. We shall not leave the river before the 29th or 30th Instant. The officers and men are animated with the greatest ardor. One of our torpedo boats sank a large Chinese cruiser. The vessels which took part in the action were the Volta, which boisted my flag; the Dusya, the Trouin, the Tromphante, the Vilars, the DeStaing, the Aspic, the Lynix and the Vipere, together with two torpedo boats.

Private telegrams received in London re-

Trivate telegrams received in London report that the Chinese forts on Mon river are holding out well against the French bombardment. The French gunboats are still unable to pass down the river. The Chinese authorities are confident of the strength of the forts.

that Admiral Coubette has been engaged in the bombardment of the King Pao forts. The fall of the forts is certain.

Baron De Courcel will return to-morrow from his conference with Prince Bismarck at Varzin. His visit followed an invitation given at his own request, and the greatest significance is attached thereto as affecting the Franco-Chinese difficulties.

A FRANCO-GERMAN ALLIANCE RUMORE A special dispatch from Berlin to the Matin Francaise, asserts that a Franco-German alli-ance has been arranged. According to this France is to obtain certain territory on the condition of uot opposing the German claim to two ports on the north sea. Both countries are to assist each other in acquiring colonies. THE RELIEF OF GORDON.

Lord Wolseley Given Command of the Khartoum Expedition. LONDON, August 27.—Rumors are current an Cairo that Egypt has notified England that she is bankrupt since yesterday, and is unable to meet current expenses.
General Lord Wolsey will start for Egypt next Sunday. He will proceed to Cairo, assume immediate command of the forces in

Egypt, and direct the operations for the relie Khartoum. All the newspapers approve of the dispatch General Lord Wolsey to Egypt to sassume of General Lord Wolsey to Egypt to "assume the chief command of the troops there. Official announcement of his appointment to this post says the preparations which have been in progress for some weeks for an expedition up the Nile resemble in a great degree those which were adopted in 1870 for the Red river expedition, which gave General Wolsey an experience which no other officer possesses. There is reason to hope that Major Kitchen's mission to Dongola will shortly afford a means of opening communication with General Gordon again, but the governments are of opinion, having a fear of the approach of the cool season, that no time should be lost in proceeding to Major Kitchen's assistance, in case his mission should fail.

PINTSBURG, August 27.—The miners working in James O'Neil's mines, third pool, joined the strike to-day. Some of the men were willing to continue work at three cents, but as they were notified the rate would be reduced half a cent next week, they came out in a body. The Pittsburg coal exchange met this morning and decided not to resume operations in the mines until trade improves.

Youngstown, Ohio, August 27.—Agents of the Hocking valley coal mines have been scouring the Mahoning and Shenango valleys for negroes to take the place of the striking miners. Two weeks ago F. S. Brooks, treasurer of the coal exchange, took from here, New Castle, Beaver, Rochester, and Pittsburg and men. He writes to agents along the line 300 men. A Xenia Bank Closes.

Xenia, Ohio, August 27.—The Second National bank closed its doors this morning. No reasons were assigned for the suspension. The president is J. P. Townsley; cashier, John S. Ankeny. The paid up capital is \$150,000. The surplus at the last statement, October, 1883, \$20,000; and undivided profits, \$23,000. There was a run on the Xenia bank yesterday, but the payments were made so promptly that confidence was restered, and many renewed their deposits. J. Sankeny had gone west. The bank to-day is in the hands of an officer detailed by the comptroller of the currency, and no statement of its condition has yet been made. Cashier Sankeny has been engaged in grain transactions with R. W. Smartt, to whom the bank, through Sankeny, recently made large advances. Smartt gave a mortgage to secure the money, but the directors were not satisfied, and demanded Sankeny's resignation. He went west, and this consed the run of varieties.

A reporter of the Morning News, while conversing upon the subject with some of the real exta firms of the city, learned that when a house is advertised for rent they generally receive a large number of applicants, especially if it is located in one of the more desirable portions of the city.

The reporter then asked if this demand did not presage high rents?

Mr. C. H. Dorseit, to whom the question was put then replied: "Rents are not high in Savannah. The large houses do not pay over 6 per cent on the amount invested in them. Smaller houses, however, pay better on the investment. If it were not for the condition of the money market during the past few menths, it is probable that rents would have been higher."

Cincinnati, O., April 14, 1884.—S. B. Smith & Bao., Covington, Ky.—Esteemed Sirs: I have been troubled with a serious kidney affection, and seeing your advertisement, con-cluded to try a bottle of your May Flower, though without much hope of being benefited by it. The first bottle worked splendidly, and persevering with its use, I am entirely relieved of my painful illness. Any one can write to me and I will reiterate what is here written.

THE ITALIANS.

Have a proverb that: "Some men are so good as to be good for nothing." It is not claimed, as is the case with many so-called remedies, that SWIFT'S STECIFIC is a cure-all, or can remove all the ills to which the flesh is heir; but as a tonic and health renewer, and for BLOOD and SKIN DISEASES, and for troubles dependent on IMPURE and IMPOVERISH-ED BLOOD, it is without a rival!

The Mightiness of Truth!

LET THE FACTS SPEAK IN STENTORIAN TONES. "Fat as a Pig."

"My baby six months old broke out with some kind of skin humor, and after being treated five months by my family physician, was given up to die. The draggist recommended Swit's Specific, and the result wass gratifying as it was miraculous. My child soon get well, all traces of the dislous. My child soon got well, all traces of the dis-race is gone and he is as fat as a piz." J. J. KIRKLAND, Minden, Rusk county, Texas.

Blood Poison Eliminated.

Golden Specific Co., 185 Race Street, Cincinnati, O. "I used Swift's Specific on my little daughter, who was afficted with some Blood Polson which had resisted all sorts of treatment. The Specific re-leved her permanently and I shall use it in my practice."

An Editor's Experience!

LAID ASIDE FROM JOURNALISTIC WORK. After trying numerous remedies for rheumatism, ut without permanent relief, I was advised to use S. S., whice had given permanent relief to others aftering from theumatism. After taking half a ozen lottles I found that the disease was entirely given out of my system and a permanent cure sedozen bettles I found that the disease was entirely driven out of my system and a permanent cure secured. This was over a year ago, and since then, even during our most severe weather, with sudden changes. I have uever suffered a return of the old attacks which disabled me from editorial work. It is very seldom, indeed, that I resommend anything to the public in this manner, but I feel it due to your valuable preparation, that has given me such long desired and much needed relief, to state these facts thus publicly. I am sure but for your Specific, I should have been laid aside from journalistic work, as the severest attack was in my right arm and hand.

Mr. John Pearson's Statement.

In the spring of 1882 I was attacked with a very bad cough, which continued to grow worse until fall, when I got so weak that I could not get about. I tried a great many kinds of medicine, but continued to grow worse. I was notified that I had consumption, and would probably die. Dr. Holloway finally told me to try Brewer's Lung Restorer They sent to Ward's store and got a bottle, and I commenced taking it right away. After taking two or three doses I began to improve, and by the time I had used up one bottle I was able to get on my feet again. I am now in excellent health. I am confident that the Lung Restorer saved my life, and my neighbors are of the same opinion. It is the best Lung Remedy ever made, in my opinion. Dr. H. promised me that he would write to the manufacturers and tell them of the wonderful cure it made in my case.

Statement of Mr. Benj. F. Hearndon. Early in November, 1881, while sewing on the aschine, my wife was taken with a severe pain in her side, which was soon followed by hemorrhages from her lungs and a severe cough. Fever commenced: she could neither cat or sleep, and in a few weeks she was reduced to a living skeleton. The attending physician told me that he thought one of her lungs was entirely gone. She could not retain the most delicate nourishment on her stom ach. I then agreed with Dr. Sullivan, my family physician, to call Dr. Holloway in consultation They made a final examination of the patient and pronounced the case hopeless. Dr. Holloway then suggested the Brewer's Lung Restorer as a last resort. I sent for a bottle and gave her a dose. I found that she could retain it on her stomach, and after about the third dose I began to notice some improvement in her condition. I continued the medicine regularly, and by the time she had taken two bottles she was able to walk about the house. She is now in better health than she has enjoyed for several years. I believe the Lung Restorer We have a family of six children, and some of them grown.

In response to the strong feeling in France in favor of an alliance with Germany, it is now announced that a treaty for that purpose has been agreed upon. It is the general opinion that Germany would willingly restore to France the provinces of Alsace and Lorraine, if France in turn would uphold Germany in her appropriation of Holland. This policy would be distasteful to England, but neither party to the negotiation care much about British opinion.

Two days ago the wires of the country

were loaded with the announcement that "Blaine is indisposed." Yesterday it was, "Blaine is well." When Mr. Blaine found out what an utter failure as a campaign dodge his sickness had made he immediately Revived. Dude William Walter Phelps was at his side and was telegraphed as having said that he was "awfully sorry." This is a sample of the aggressive campaign which Blaine was to conduct. Logan is now doing the aggressive part, and his managers are thinking seriously of bringing him home and muzzling him, so that he can only talk by signs.

Some intensely excited citizen of Dubufue, has written a letter to Governor Hendricks suggesting a change in the national democratic ticket, fearing that the malignities being heaped upon Governor Cleveland may injure the prospects of the party. The reply of the governor expresses the utmost confidence in the strength of the head of the ticket, whom he says "should be judged by his public record, and by his capability and fitness for the discharge of his duties, and not by old and exploded private slanders, which are unworthy of a national contest. He thinks that the ticket is decided by the stronger one before the people and feels as-

THE experiments of Dr. Koch, the great Jerman cholera expert, in the presence of death in its most frightful form, entitles him to the consideration of posterity as one of earth's greatest heroes. Koch and Pasteur bave well nigh solved the problems connected with two of the most fatal diseases with which mankind is afflicted. Foo Chow, about which place active opera-

tions are now going on, is one of the two treaty ports of the province of Fuh-keen, of which it is the capital. It is situated on the Min river, twenty-five miles from its mouth. The city is surrounded by an amphitheater of hills at a distance of four miles. The town is enclosed in a castellated wall of nearly ten miles in circumference, outside of which are suburbs stretching up into the hills, the whole commanded by a fortified hight 500 feet above the plain. In the city proper is another hill crowned by a conspicuous watch tower. At the town itself the river is crossed by a long bridge on granite piers, partly covered with shops. Foo Chow contains half a million people, has good shops and houses and a main street with residences for public functionaries. Large quantities of cotton goods are manufactured, and the city has hundreds of ovens for the production of porcelain, while there extensive lead mines in the vicinity The district around Foo Chow is well known for its black teas, which is procured there

HYPERCRITICISM. Editor Dana is surely growing hypercritical in his old age. He takes from Governor leveland's letter of acceptance this senence "It should be remembered that the office of president is essentially executive in its nature." and remarks: "This declaration has been hailed as an utterance of remarka ble wisdom which ought to know that the

president has a great deal to do with making aws as well as exercising then: The Sun then goes on to say that this is a oor apology so far as Governor Cleveland is oncerned, for refraining from a discussion of the more important subjects upon which it

will be his duty to advise congress in the event of his election. Surely this is hypercriticism. Is the ser tence quoted from Governor Cleveland's letter intended to be an apology for anything? far as we are concerned, we have seen no ournal bailing it as an utterance of romarkable wisdom. It is a simple statement of a fact. The duties of a president are essentially but not exclusively executive in their

nature, and the attempt of Editor Dana to show that they are otherwise is simply editorial hair-spliting that amounts to nothing. The president recommends what he coneives to be necessary legislation, and vetoes what he conceives to be bad legislation, and there is not an honest democrat in the country that is not willing to trust Governor

veland's patriotism in the office of president. Let the Sun furn its attention exclusively to Butler, whom it denounced a few years ago as a charlaton and demagogue.

A REPUBLICAN CONSPIRACY.

There are some funny things connected with the star route trials. Some of these have already been told by that jaunty statesman, the Hon. Benjy Brewster, and some have been hinted at by that veteran in triguer, George Bliss. Some of the funniest however, have been unearthed by the newspapers. One of these latter is interesting as well as funny.

It seems that Walsh, the principal witness against Kellogg, wrote to President Arthur complaining that Bliss and Bill Chandler had formed a conspiracy to prevent the indict ment of Kellogg. Arthur sent Walsh's letter to the attorney general and instructed him to communicate with Chandler and ask an

Brewster, however, first wrote to Bliss about the matter, though why he should write with Bliss within bell call is one of the mysteries of red tape that honest men canno afford to understand. Bliss replied, denying the accusation, but suggested the necessity of keeping from Walsh all knowledge of any unfavorable comment that might be make upon him by the officers of the government, explaining that Walsh would seize on the slightest excuse to refuse to appear as a wit-

Brewster then wrote to Bill Chandler in a half apologetic way, making known the instructions of Arthur, and cautioning him against allowing Walsh to know of any comments that might be made on him. The result was peculiarly billchandlerian, if we may be allowed to coin a word to fit the new species of knavery introduced into politics by the republicans.

Bill Chandler lost no time in giving to Kellogg the letter written by Brewster reflecting on Walsh. Kellogg was interested in driving Walsh away, and he, in turn, showed the letter to Walsh's intimate friend, Warmouth. The result was that Walsh be lieved the entire administration would strive to break him down, and he disappeared, going to New York when he was wanted as a

The Philadelphia Times says that Chandler could have no other purpose than to drive Walsh away; but the same remark would apply with equal force to the entire adminis tration. Why should Brewster reflect on Walsh in a letter to Chandler? Why should the government officials engage in a formal and ponderous correspondence in this mat-Simply because it was necessary to dis credit Walsh and save the thieves. The whole star-route prosecution, so far as the government was concerned, was a conspiracy to shield thieves and knaves.

A MONOPOLIST IN DISGUISE. Mr. Edward Atkinson, of Boston, has made some reputation as a political economist and as a writer on industrial questions, but he is in a fair way to become an object of public ridicule. In a recent article, which is severely criticised by the press, Mr. Atkinson makes the following startling statements: The monopolists, if any such there are, who are grinding the faces of the poor and rendering bread dear are not the Vanderbilts, the Garretts or the Jay Goulds, but they are the nameless bakers, grocers and others who have added enormous charges to the cost of bread and meat. The whole railway service, from the field to baker's oven, costs but half a cent a pound, but the service of the baker, and the grocer, and the shopman costs two and a half cents to four cents for every pound of bread. After you have succeeded, he says, in abating these enor mous charges: after you have regulated the simple traffic of the baker, the grocer, the butcher and provision dealer; after you have prevented them from "grinding the faces of the poor," then take up the railway question and see what there is left

by statute and reduce its price, and, second, reduce the cost of barrels or require the substitution of cheaper sacks, you may then be fully prepared frame suitable statutes for the regulation of th railway service.

According to Mr. Atkinson, we should ransfer our indignantion to the victims of the railway monopolists, instead of compelling the monopolists themselves to act within the limits of their charters. We should, in his opinion, allow the railway plutocrats to disregard all the sound legal principles which have governed common carriers from time immemorial, and permit them to monopolize public highways for their private gain without regard to the rights and interests of communities and individuals. All this is simply monstrous.

The Boston political economist would have the strong hand of the law take hold of the poor retail grocer who is kept all the time alternating between beggary and bankruptcy on account of the railroad kings, but he has not one word to say against the misuse of railway charters and privileges. Mr. Atkinson must know that railroad monopolists build up pet towns, corporations and indi viduals by giving them secret and advantageous rates, and he must know that such pratices operate to the serious prejudice of the people at large and the traders who are not specially favored. And yet he attempts to divert attention from the original mischiel makers by calmly suggesting that it would be a good idea to make it hot for the butcher, the baker and the grocer. We cannot see it in that light. We must go to the fountain head, to the original source of the evils complained of. When we straighten out the monopolists the natural laws of trade will regulate the minor matters that weigh so heavily

upon Mr. Atkinson's mind.

WHO THROUGH MALICE BURN THEIR OWN CHURCH.

Other Matters in Macon-Hawkins Bound Over-Gorham Goes to Jail--An Enoch Arden Case, The Postoffics--The Bohemian Chat--A Mixed Affair -- Other Gossip.

MACON, August 27 .- [Special.]-There is no place in the south where the negroes make more pretentions to religion and have more dissension mong their churches than they do in Macon, and when they squabble the first idea that seems to strike them is that of setting fire to the church a a means of seeking revenge. A peculiar case is

before the courts to-day.

Friendship Baptist church is situated in the rear of the Bibb manufacturing company, at the head of First street. The church membership is made up of the most ignorant and turbulent se of negroes to be found in this section. It was for nerly established under the notorious Eli Smith who has figured prominently in state politics and more recently in the courts. Under his regime the church was burned about two years ago and some of its members were suspen having done so on account of a general breaking up among the members. They were arrested, and as no conclusive evidence was established, were

After the burning of the church the present site
was selected and a new one built. At a conference

In the tumult Conner arcse and said: "The way you all are going on in your business is too fast and the next thing you know your church will be burnt." The conference closed and everybody was mad. The church had neared completion and a watchman was placed in it to prevent it from being molested. Last Saturday night the watchman was dismissed by Crawford and Cooper by their own authority.

Sunday morning about 4:00 an alarm of fire was sounded It proved to be Friendship church, and the flames soon completely did away with it. The negroes became much excited and one faction began to accuse the other of it. Nothing was heard of the matter until yesterday. Officers Charles Goodroe and Louis Nelson arrested Frank Conner, Rafe Gilbert, May White and George Jordon, charging them with arson.

The defense, the Eli Smith faction, was represented by Messrs. W. B. Hill and Sam H. Jemison, and the prosecution by Colonel Thomas Willingham, Jr. In the beginning of the case the judge took occasion to say that there was an idea among the negroes that one could burn another's house without the least hesitancy and get off light, but that the crime of arson was punishable by hanging. When he finished there was much commotion among the crowd, and all evinced signs of displeasure.

KUCH RELATES HIS INVES GATIONS IN BERLIN.

winute and Technical Narration of His Expo ments With the Cholera Patients, Beginning With the Original Germ of the Cholera and Carrying it on Through.

PHILADELPHIA, August 27 .- An impo enterence upon cholera has just been hele Berlin, at the office of the imperial board health, an abstract of the proceeding which is now appearing in the Medical M of this city. Dr. Koch exhibited microse specimens of the cholera bacillus, and nonstrated the method of its preparat and cultivation. Regarding his recent invest gations, he stated that microscopical exam nation of the intestine and its contents vesled a considerable invasion of bacteria. erring partly within the tubular glan rily between the epithelium and the ba ment membrane, and in some parts deep ment membrane, and in some parts deep still. Then he found cases in which besides bacteria in one definiand constant form, there were other also accumulated within and around the tubular glands of various size some short and thick, others very fine, and it some concluded that he had to do here with the concentration of the pathogenic besides. soon concluded that he had to do here with t primary invasion of the pathogenic bacit which, as it were, prepared tissues for the e trance of non-pathogenic forms, just as he h observed in necrostic, diphtheritic changes the intestinal mucosa, and in typhoid ulcers. THE CWARACTERISTICS DESCRIBED.

He then proceeded to describe the characte of this bacterium. It is smaller than t ubercle bacillus, being only about half or, most, two-thirds the size of the latter, h much more plump, thicker and slight

tubercle bacillus, being only about hair or, mest, two-thirds the size of the latter, be much more plump, thicker and slight curved. As a rule, the curve is no more the that of a comma, (,) but sometimes it assum a semi-circular shape, and he has seen forming a double curve like an "s." The two variations from the normal being is su gestive of a junction of two individus bacilli. In the cultures there ways appears a remarkably for development of the comma-shaped bacil These bacilli often grow out to form lost threads, not in the manner of the anthrax be cilli, nor with a simple undulating form, be assuming the shape of delicate, long spira corkscrew shape, reminding one very forcib of the spirochete of relapsing fever. Indee it would be difficult to distinguish the two placed side by side. On account of this developmental change, he doubted if the chole consideration and the same shape which we will be called in the chole of the same shape and the size of the chole of the same shape and the content of the chole of the same shape and the content of the chole of the same shape and the content of the chole of the same shape and the content of the chole of the content of the content of the chole of the content of placed side by side. On account of this developmental change, he doubted if the chologranism should be ranked with baccilli; is rather a transitional form between bacil and spirillum. Possibly it is true the spirum, portions of which appear in the company that is the company of the company but consist only of more or less curved rods
THE INFLUENCE OF TEMPERATURE.

The comma baccilli thrive best at tempeture between 61 Fahrenheit, and 104 Fahrenheit, heit, but they are not very sensitive to l temperatures, their growth not being preve ted until 62½ or 86 degrees is reach ted until 621/2 or 86 degrees is reac In this respect they agree on enthrax bacilli. Dr. Koch made an experia to ascertain whether a very low tempera not merely checked their development, killed them, and subjected the comma ba to a temperature of 14 degrees fabrent They were then completely frozen, but yet mined vitality, growing in gelatine as nqueous solution of iodine (1 in 4,000) neat infusion, in the proportion of I 10, did not in the least interfere with growth of bacilli in that medium. He the growth of bacilli in that medium. He distinct pursue this line of inquiry, seeing that it ractice large quantities of iodine than the culd not be given. Alcohol first checks the divelopment of the comma bacilli when it is maked with nutriment fluid, in the proportion one in ten, a degree of concentration which renders it impracticable for treatment. Common salt was added to the extent of two pears, without influencing the growth of the ent, without influencing the growth of destroying bacilli. Among the other su tances which prevent the growth of the cor na tacilli may be mentioned; Alum in sal tions of strength of 1 in 100; camphor, 1 300; carbolic acid, 1 in 400; oil of peppermit in 2,000; sulphate of copper, 1 in 2,500 remedy much employed, but how much would really be needed inerely to hinder the growth of bacilli in the intestine); quinine, 1 in 5,000 and sublimate 1 in 100,000.

In contrast with the foregoing meast for preventing the growth of these bacillist triking fact that they are readily killed drying. This fact is proved by merely drying. This fact is proved by merely drying a small drop of material containing the buillion the cover of a glass, and then placifies over some of the fluid on the glass slit Thus it was found that, although vitality we retained, or depending largely up the number of bacifit for a shallow the with the wild read of the nutrient of the province of the provinc time, yet the withdrawal of the nutrient fl for an hour or even less, often sufficed, an never happened that the bacilli retained tality after a deprivation lasting twenty-hours. These results would seem to point the fact that the comma bacillus does like the organisms of anthrax and vacpass into a resting state by drying, and it is one of the most important facts in etiology of cholera. Much, however, mains to be done, espec to be done, especi the regard to the soiled linea s cholera patients being kept in a di te. He found that in soiled articles w ried for a time varying from twenty ours and upwards, the comma bacilli uite destroyed. Nor was the destruction hours and upward the destroyed. Nor was the destroyed layed by placing choleraic excreta in or use the earth, dry or moist, or mixed with a nant water. In the gelatine cultures the nant water. mant water. In the gelatine cultures the co-ma bacilli can be cultivated for six weeks, a also in the blood serum, milk and pota when anthrax bocilli rapie

anthrax but form sporese, but a rest state of comma bacilli has never been with. A very exceptional thing in a case with. A very exceptional thing in a case acilli, and another reason why the organust be regarded rather as spirillum becilus and comma bacilus, has now found in nearly one hundred cases of chole occurring in constant relation to the cho-process, being most abundant in the lower of the iloup, where the changes are most Process, being most abundant in the lower of the fleum, where the changes are most intense, and being most pure in acute uncomplicated cases. On these ground the comma bacillus may be considered a specific to cholory. cific to cholers.

Many observations were made in other discasses, and in subjects who had recently passed through the attack of cholera without finding these bacilli in the delicate or in the threugh the attack of cholera without finding these bacilli in the dejecta or in the bowels. The whole citiology of cholera, so far as a list knewn, suggests the censative view taken as regards the comma bacilli. They multiply rapidly, seen reach their term, and are supported by other bacteria. So in the intestine ithey multiply, set up irritation, and diarrhea and all typical symptoms of cholera escizure. Under the normal condition in animals at least, bacilli are destroyed it the stomach, and this harmonizes with the important part played by the predisposition and liability of those to be attacked, who as suffering from gastric or intestinal catarric who have overladen their stomachs with undigested food, conditions which wou facilitate the passage of the bacilli unchanging the intestine. But the bacillus is limit to the intestine. But the bacillus is limit to the intestine; it is not found in the mesent the intestine; it is not found in the meso

TUDY OF THE MICROBE. R. KUCH RELATES HIS INVESTI-GATIONS IN BERLIN.

But even yet the discovery of cholera bacillus is important, as furnishing an aid in a diagnosis which would facilitate the detection of the first case occurring in a district, and the adoption of measures to prevent its spread. Knowing also the nature and properties of the bacillus, and especially ctants checked, so that there will not be epetition of what happened in the last epi-temic, when millions of gallons were poured nto the gutters and sewers without the slight-st need. Even therapeutically, the knowlge of the comma bacillus may be of value. diagnosis will be possible in mild cases, and the early stages of the disease when treat-

ment is of the most avail.

THE OUTLOOK IN THE INFECTED DISTRICTS.
The Medical-News will publish the following editorially in next Saturday's paper:
The outlook in France, Italy and Switzerland is not so good as it was a week ago, and the late increase of the cholera at Toulon would seem to indicate that the disease has lost none of its force in the quarter where it first made list appearance over two months since. Its gradual spread throughout outhern and eastern France, crossing the Alps and nyading Italy and Switzerland on the one hand, and stretching eastward to the bay of Bengoe on he other, would lead us to fear that the prophecy of Professor Koch may yet be verified, that all lurrope will suffer with the scourge before it takes is final departure. In our own country, he have so far been very fortunate, escaping both clow fever and cholera, though more than once breatened by yellow fever ships, and at least once ye a cholera infected vessel. The vaunted "sanity precautions," suggested as preventative of holers, and inaugurated in many of the villages ment is of the most avail. tary precautions," suggested as preventative of cholers, and inaugurated in many of the village of France, has proven futile.

THE CHOLERA RAGING.

The King of Italy Visits the Scene in Piedmont-The Reports from France. PARIS, August 27.—King Humbert and rime Minister DePretes, of Italy, arrived esterday at Busca, a city of about 10,000 cople, in the province of Cunco, Piedmont. They visited the cholera patients at the hos-points, and left \$2,000 for the relief of the sur-ferers. The Italian peasants in the cholera districts repel the doctors and prefer to trust districts repel the doctors and prefer to trust in charms and superstitious observances. At Busca a girl was found dying in a filthy room, in which two sheep were feeding from a filthy trough. The sheep were allowed to be there because of a superstitious belief that their wool would absorb the disease. The peasants are profound believers, likewise, in the powerful efficient of precessing the powerful efficient of the processing the state of the powerful efficiency of the processing the process of cacy of processions. A serious tumult occur-red yesterday at Lucia, because the prefect prohibited a procession. It was necessary to call out the military to quell the disturbance and several of the rioters received wounds.

A false report got abroad in Civita Vecchia yesterday, to the effect that the Italian gov-ernment was about to establish a quarantine of fifteen days against that city. This created a furor of excitement among the tourists of all classes. Eighteen hundred persons of all sorts, including even the hotel waiters, beseiged the railway station and took the freight train by storm. Five hours were spent in passing over the thirty-eight miles to Rome, where they arrived in a most forlorn and de-moralized condition. They were an angry throng when they learned that the report which caused their panic had no foundation.
The following bulletin shows the progress of
the chelera in Italy during the past 24
hours: Aquila, two fresh cases; Bergano, eight deaths, three fresh cases; Poretta, four fresh cases; Montagna, two fresh cases; Campobasso, seven deaths, ten fresh cases; Paterro, one fresh case; Busca, ten deaths, thirty fresh

cases; Fosdenora, four deaths, two fresh cases; Naples three fresh cases; Parma, three deaths, four fresh cases; Pisa, six fresh cases; Porto Maurizio, one fresh case; Turin, seven deaths, the fresh cases.

The report of the ravages of cholera in the southern departments of France during the last twenty-four hours is as follows: Herault, seven deaths; Gard, one death; Aude, one death; Eastern Pyrenees, twelve deaths.
There were two deaths from cholera in lon last night. The condition of the city is

improving.

There were no deaths from chelera in Mar-A Marseilles dispatch says the public have subscribed \$12,300 francs for the relief of the

chelera sufferers.

The mistral is again blowing off Toulon. No deaths from cholera have occurred there since morning. There were two deaths from cholera at Tourvres to-day, and one at LaSeyne. The record of cholera in the Coulon hospitals for the twenty-four hours Germany has submitted a proposal to the powers that there should be at Suez a strict quarantine of three weeks duration for ships om cholera ports which pass through the canal.

Stocks as Reported in the New York Stock

Exchange. NEW YORK, August 27.—The stock market to-day was barely steady at the opening and soon he weak and lower on account of unfavorameerning trunk lines and Coal com us. Lackawanna was attacked with great everity by bears, the price being forced down to sold the decline outside of Lackawanna ranged from 14 to 114 per cent. Texas Pacific was affected with adverse decision in the Markov and the sold to 115 per cent. the adverse decision in the Marloe case. Before m. the temperature of speculation changed for the better and the market continued strong aughout the day. The advance was brought about by general buying for long account, which frightened shorts into covering. Union Pacific, rangers, Vanderbilts, Pacific Mail and Western Union were most conspicuous in the improve-ment, which ranged from 1/2 to 31/4 per cent. In the final transactions there was a reaction of 11/4 to 114 per cent, due to realizations, but the market left off firm. Compared with last night's close prices were 1/8 to 11/8 per cent higher, except for Louisville and Nashville, which was 3/8 per

cent lower. Sales 335,000 shares. Exchange 483% Money 1% Sub-treasury bal-ances: Coin \$126,429,000: currency \$13,201,000. Gov-ernments strong; 4s 120%; 3s 100% State bonds 7914 Mobile & Ohio...

THE CHICAGO MARKET. Features of the Speculative Movements in Grain and Produce.

By telegraph to The Constitution. CHICAGO, August 27—A great deal of life was infused into the wheat market to-day, and the ther cereals also were more than unusually active in sympathy. Speculative trading in wheat was on rather an extended scale, and there was a marked increase in the amount of outside business. The feeling was stronger and prices higher, influenced largely by a reported decrease in the visible supply in New York, the statement show ing even a larger reduction of the stock in sight then did the Chicago statement. The Chinese war news seems to have an effect on the course of the market. Early trading was at an advance of %@ %c, and easing off %@7%c, rallying again and closing on the regular board 2 over yesterday. On the afternoon board the feeling was again stronger and trading progressed amid considerable excitement; values rose 1/6%, the market closing at

86% for September, 82% for October, 83% for November and 85c for December. Corn was in good demand and ruled stronger. The market opened 1/4@1/2c higher, then declined A @le under free offerings, but rose again and closed %@%e higher than yesterday on the regu-On the afternoon board prices advanced 4.6. c, the market closing at 513/40525/c for September, 50% for October and 46% for November Oats ruled strong and higher, closing at 25%c for August, 251/2 for September and 261/2c for October Pork was unchanged, except for all the year Lard was strong, closing at \$7.50 for August and

September and \$7.621/2 for October. PROVISIONS, GRAIN, ETC.

HIS DEATH LATE YESTERDAY AF-TERNOON.

End of the Career of a Noble Hearted and Well Known Young Atlantian—He is Conscious to the Last and Bids Good Bye to His Noved Ones as Death Claims Him.

Colonel Litt C. Jones, a prominent and popular Atlantian, died last night at his residence on Marietta street, corner Spring. Colonel Jones's death, though not altogether

unexpected, was rather sudden, and the intelligence will be a sad surprise to his many friends. He has been ill for some time, and though his physicians believed his illness fatal, they thought that his life might be prolonged a few days, but their hopes were disappointed. For nearly two months Colo-Jones has been upon a bed of sickness, and during that time has suffered greatly but with that fortitude which was so strong a characteristic he bore the pain and when death came bravely met it. Colonel Jones's death was due to consumption. Six months ago he had no idea that that terrible malady would ever seize him but it came and his constitution, which had been weakened by a severe and lengthy illness about a year ago, was unable to battle with the disease and swiftly it led him to death. His death was painful and the struggle was long. Night before last he was quite low but yesterday morning he rallied and at noon appeared to be so much better that his appeared to be so much better that was thought that he would live several days but about four o'clock yesterday afternoon HE BEGAN TO SINK AGAIN.

Rapidly he went down and when the clock struck six, death manifested itself upon his brow, and those about him knew he was breathing his last. He too realized it and calling his wife and his friends about his bed-side he bade them good bye, and then began his last struggle. It was a hard fight and his his last struggle. It was a hard fight and his sufferings were intense. Before his death his brathing was extremely difficult and the beads of perspiration on his forehead showed the awful battle he was fighting. His friends stood around him and watched him as he went further and further from them, unable to do anything for him saws to them, unable to do anything for him save to wipe away the drops as they accumulated, and to lan his flushed face. He was perfectly cons upon his wife and daughter, awaited to eyes upon his wife and daughter, awaited the final moment. It came, and with one terrible effort to breathe, the brave man sank to sleep ferever at 6:35 o'clock. His death was sad, and was witnessed by Messrs. G. F. Moody and C. K. Maddox in addition to his family.

A SKETCH OF HIS LIPE.

Colonel Jones was widely known in Atlanta, where he has lived since 1868. He was born in Lexington district, South Carolina, and when he first came to Georgia located in Macon county. In 1868 he was elected to the Georgia legislature from that county, and when he come as a representative he came to make Atlanta his home for the rest of his days. When his term in the legislature expired Colonel Jones accepted a position with the Western and Atlantic railroad as a clerk in the general freight department. Some time ago Colonel George Adair discovered on the arbor vite in his yard at West End some ugly insects which were fast destroying the vitality of the shrubs to which they were harding. The insects which streying the vitality of the shrubs to which they were hanging. The insects were encased in cone shaped pods which, when broken, revealed an ugly spotted creature an inch or more in length with a glaring black eye. About the same time reperts of the ravages of this same insect came from several other parts of the city. Varicus methods of destroying the pest were suggested and tried with very partial success. A letter recently received by Mr. J. J. Sprnger, of this city, from Prof. S. S. Rathron, of Lancaster, Pa., shows that he has made a therough study of the insect in question. It has been very destructive in Pennsylvania and several surrounding states. Various learned essays have been written on the nature and babits of the creature. The generic names given signify an in-babilant of a single cell, while the specific rame relates to the form of "ephemeya," or rame relates to the form of "ephemeva," or day fly. The creature is a tough customer to dispose of. His shell is impervious to the acids and washes which are fatal to most in-sects. The male dies late in the fall, but the fenale with her shell full of eggs haugs on to the tree or shrub firmly through the severest the tree or shrub firmly through the severest winter, and in the spring comes out with a large and hungry family. The safest and most practical way yet found to get rid of these insects is to clip the shells from the vegetation on which they are depending. In some cases they are so thick as to make this a very tedicus operation, but it is the most effective way to dispose of the insect with the unpropagates. ose of the insect with the unpronounce-

THE COUNTY ALMSHOUSE. How the Work on the New Quarters Stands

-Savinger's Missing Children. Dr. Hope, superintendent of the county almshouse, was in the city yesterday, and a Constitution man asked him how he was get-

Constitution man asked him how he was geton with the new quarters for the inmates.
Said the doctor:
"We are getting on very well. There is a
force out there of sixteen convicts, and they
have cleared off the brickyard, and are preparing to make the brick that we will need.
The lumber has been ordered for the
construction of camps for the convicts, the trawn up and we are about to get fairly darted in on the work."

"How fast will you progress with it?"
"We will have to make 400,000 brick and you know winter is coming and that will interese with our work. We will fix up the present white quarters before winter so that they will be comfortable for one more winter. We expect to finish the new quarters by the middle of next summer. The new quarters will then be given to the white paupers and the quarters now used by the whites will be turned over to the colored inmates."

"Are Savinger's children in the poor house?" asked the reporter, remembering that when "Are Savinger's children in the poor house?" asked the reporter, remembering that when the accused murderer left the jail a few days ago he started toward the poor house to collect up his missing family.

"Yes, they are out there, but Savinger has not called for them yet. He can get them when he does. There are three of them. The oldest a boy of ten, and there are two girls, the

PAST GRAND SIRE GLENN. The Portrait of the Venerable Odd Fellow

Leaves for Baltimore. Last night Mr. Horace Bradley's oil picture of Judge Luther J. Glenn was shipped to Mr. Theodore A. Ross, of Baltimore, to be hung in the Odd Fellows' hall there, along with the portraits of the past grand sires of the order

born in Baltimore in 1819, and that city is considered the home of Odd Fellowship. In 1880 Judge Glenn was elected grand sire of the grand lodge of the world which met that year at Toronto, Canada. That put the venerable Odd Fellow at the head of the order, which has 500,000 members and is one of the strongest and most honered of such organizations. His territory was greater than any prince or king ever conwas greater than any prince or king ever con signer. He was a bigger man than "old dolled. He was a bigger man than "old ant" and his Atlanta friends duly appreciant and his Atlanta friends duly appreciated the compliment. His term expired two years ago and he became past grand sire. It is a custom to place the portraits of the grand sires in the hall at Baltimore, and a resolution and a resolution requesting Judge Glenn's portrait was passed and it was furnished accordingly. It is a very handsome picture of the genal past-grand sire, and will be an interesting face in the large collection of portraits in the hall.

WALTER JACKSON DEAD.

Chief Justice Jackson to Reach Water Valley To-Day-The Funeral.

As was feared from the intelligence received the night before, yesterday brought the news of Walter M. Jackson's death. Tuesday midnight Chief Justice Jackson had started for Mississippi in the hope that he would at least reach his son's bedside before the fatal hour, but it came while he was on the road. He will reach Water Valley this morning and will probably start back immediately with his son's remain. probably start back immediately son's remains. A TEMPERANCE CELEBRATION.

The Seventeenth Anniversary of Wenona Cold Water Temple.

Last night was the seventeenth anniversary Wenona cold water temple. Good Templars' hall Wi itehall street, was packed with children rom six years old to templars of sixty. To say that the juvenile portion enjoyed themselves would but feebly express it. A joilier set never congregated by J. G. ThoWer, who after some appropriate remarks to the children, introduced Mr. W. S. Withers to open the eeremonies formally with preyer. Mr. J. D. Dodd was then introduced, who ogether with a glee club of twenty choice singers

and Professor Weisenfeld at the organ, sang an

opening anthem.

The following programme was then rendered:
Recitations by Missas Phiris and George, followed by Glee club.
Recitation by Miss Jessie George.
Recitation by Muster Freddie Mills.
Solo, (organ) Professor Weisenfeldt, followed by song by Glee club.

Miss Phirl, as Aunt Betsey. Glee club, with song: "Ha! Ha! Ha!" Refreshments in the way of fee cream and cake were then served, and the young and old folks resumed their hilarity.

Mr. Dedd and Professor Weisenfeldt were accompanied by the following singers: Misses Alice Blanch and Florence Budden, Mrs. Anderson, Misses Evic, Carr, Vickle and Salile Dodd, and Miss Jessie Young. Messrs. T. W. Dunnington, tener; T. J. Miller, bass, Mr. Robbins, bass.

After being called to order again it was an anounced that it was about "bed time." Music was called for, when the club sang "Turn away from wine," when Mr. Dodd and friends were voted the thanks of the assembly by a raing vote. Mr. Dodd responded in a feeling manuer and announced himself ready at any time to battle in the cause of temperance.

Professor Weisenfeldt by request gave some ex-

Solar Tips.

Messrs. John Mundell & Co., manufacturers of the celebrated Solar Tip Shoes for girls and boys, complain that a great many purchasers are deceived by dealers who sell an imitation shee which are called by names so nearly like Solar Tip that they meet with sale on the reputation of the genuine article. The genuine Solar Tip Shoe is the only article made by this house, (they turn out about 5,600 pairs a day) and are brought to such perfection that for wear comfort and price they stand unequalled. Our subscribers need not be deceived as every pair of genuine Solar Tip has trade mark and our subscribers need not be deceived as every pair of genuine Solar Tip has trade mark and hame of John Mundell & Co., on the sole, and the inside liming of each shoe is stamped, "Patented February 19th, 1878."

ABOUT THE LOCK UP.

What the Police Department Found to do Yesterday-Some Arrests.

George Parks, a negro man, was yesterday arrested by Patrolman Brenning. Parks is charged with the larceny of a dog. Several days ago a valuable dog, belonging to Mr. Fechter, who lives on Harris street, disappeared. Mr. Fechter made a diligent search for his dog and yesterday ascertained that Parks had sold it to Mr. Seidell. The dog was recovered and Parks was arrested.
